Dr. Dangs Lab's H. pylori test profiles have been curated to provide accurate and timely detection of Helicobacter pylori infections. Helicobacter pylori (H. pylori) is a type of bacteria that can infect the stomach lining and is a common cause of various digestive disorders.

The Basic H. Pylori Profile includes essential blood tests. The H. pylori serology test detects the presence of antibodies in the blood (by measuring IgA, IgG, and IgM), enabling the identification of recent or past H. pylori infection.

The Advanced H. Pylori Profile includes the H. pylori stool antigen test in addition to the tests in the Basic Profile. This test is essential to detect the presence of H. pylori antigens in the stool, providing crucial information about current infections.

The Comprehensive H. Pylori Profile includes the quintessential and highly sensitive H. pylori Urease Breath Test— a non-invasive diagnostic test used to detect the presence of H. pylori bacteria in the stomach. It involves the patient drinking a special liquid, which is metabolized by the bacteria and produces a unique chemical that can be detected in the patient's breath.

With our test profiles, healthcare professionals can efficiently diagnose and monitor H. pylori infections, enabling prompt treatment and improved patient outcomes. Clinical correlation is essential for interpretation, and a biopsy remains the gold standard for diagnosing H. pylori infections.

Basic H. Pylori Profile

BASIC H. PYLORI PROFILE

- HELICOBACTER PYLORI IGG
- HELICOBACTER PYLORI IGA
- HELICOBACTER PYLORI IGM

INR 6500

Advanced H. Pylori Profile

ADVANCED H. PYLORI PROFILE

- HELICOBACTER PYLORI IGG
- HELICOBACTER PYLORI IGA
- HELICOBACTER PYLORI IGM
- HELICOBACTER PYLORI STOOL ANTIGEN DETECTION

INR 8900

Comprehensive H. Pylori Profile

COMPREHENSIVE H. PYLORI PROFILE

- HELICOBACTER PYLORI IGG
- HELICOBACTER PYLORI IGA
- HELICOBACTER PYLORI IGM
- HELICOBACTER PYLORI STOOL ANTIGEN DETECTION
- HELICOBACTER PYLORI BREATH TEST*

*Please note that a prior appointment & a special test kit is required for this test.

INR 13400
